Welcome, Test Test

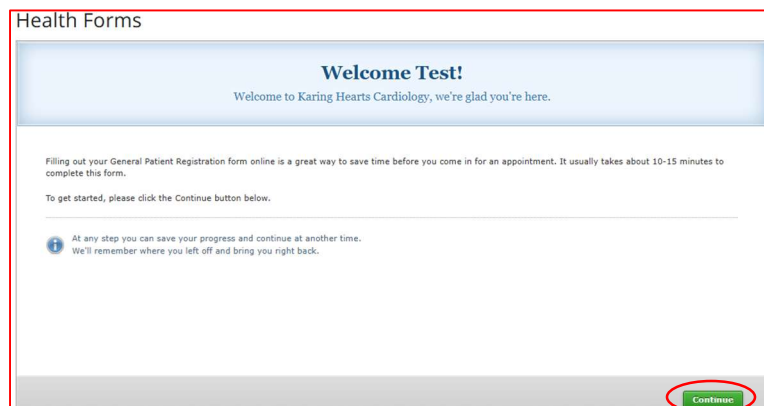

Please complete your patient registration form. [Start Registration](#)

Appointments Messages

Once you’ve created your account, you’ll need to fill out a patient registration form. Click on “**Start Registration.**”

Patient Portal Instructions

Select **“General Patient Registration”** from the published forms. To gain full access and visibility of the patient portal, **you must complete this registration**. If you would like to skip the registration and come back to it later, it can be found in “Health Forms.”

Health Forms

Welcome Test!
Welcome to Karing Hearts Cardiology, we're glad you're here.

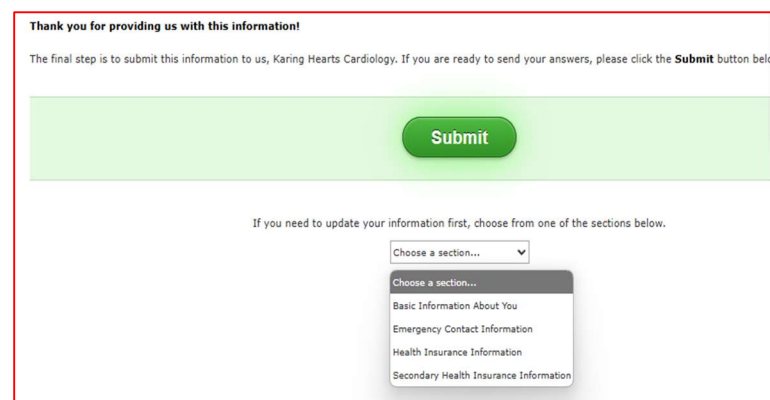

Filling out your General Patient Registration form online is a great way to save time before you come in for an appointment. It usually takes about 10-15 minutes to complete this form.

To get started, please click the Continue button below.

At any step you can save your progress and continue at another time. We'll remember where you left off and bring you right back.

Continue

Your screen will appear as shown. Select **“Continue.”** This registration will request your demographic details, HIPAA Privacy preferences, and insurance information.

Thank you for providing us with this information!

The final step is to submit this information to us, Karing Hearts Cardiology. If you are ready to send your answers, please click the **Submit** button below.

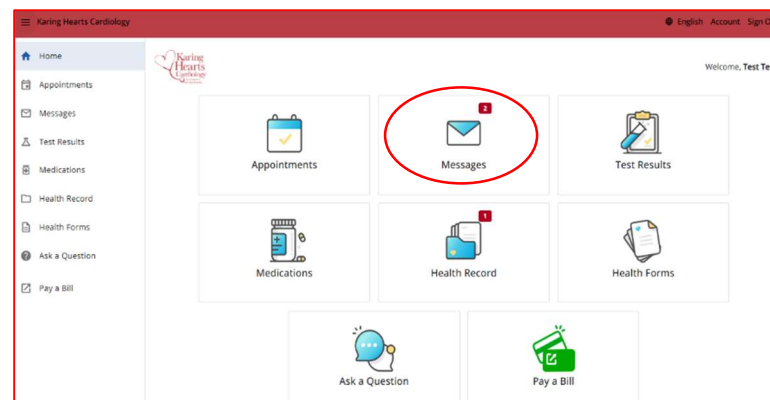

Submit

If you need to update your information first, choose from one of the sections below.

Choose a section...
Basic Information About You
Emergency Contact Information
Health Insurance Information
Secondary Health Insurance Information

You can go back and edit or make any changes before submitting.

Once you've submitted the form, you can close it.

Congratulations, you are now officially in the portal! Any new updates will be sent to you via email and/or text. When you log in to check these updates, you can find them all in the **“Messages”** tab.

Patient Portal Instructions

How to access the patient portal sign-in page:

A simple way to access our patient portal is by visiting our main webpage and clicking on **“Patient Portal”** located at the far right of the screen, as shown above. This will take you directly to the login page.

This is where you can sign in on your computer or mobile device using the username and password you created.

Patient Portal Instructions

If you are having issues with your patient portal...

Please refer to your notes for your patient portal username and password. If you've forgotten either, you can click on the option **"I forgot my username and/or password."** After doing so, you'll receive an email with instructions on how to reset your login information.

- It is also important to note that after **6 months** of no activity, you will be prompted to **change your password.**

Please note that when you log into the patient portal, you may not have immediate access to all of your health information and history. Our system does not automatically transfer data from the Electronic Health Record (EHR) to the portal. As a result, any test results, reports, or visit notes will need to be manually uploaded by our team. Once these documents are sent, please allow up to **24 hours** for a notification to appear. You can access the information under the **"Messages"** tab.

- **For any urgent matters or test results, our clinical team will reach out to you directly by phone. Therefore, please do not rely on the patient portal for time-sensitive or critical health information.**

If you're having trouble signing in, encountering other issues, or have questions, please don't hesitate to reach out to us for assistance.
